eNet Systems, Inc. Recognized for Excellence in Managed IT Services

Houston, March 8, 2018 – eNet Systems, Inc., a Total Technology Solutions Provider, announced today that CRN®, a brand of The Channel Company, has named eNet Systems, Inc. to the 2018 Managed Service Provider (MSP) 500 list in the Pioneer 250 category. This annual list recognizes North American solution providers with cutting-edge approaches to delivering managed services. Their offerings help companies navigate the complex and ever-changing landscape of IT, improve operational efficiencies, and maximize their return on IT investments.

In today's fast-paced business environments, MSPs play an important role in helping companies leverage new technologies without straining their budgets or losing focus on their core business. CRN's MSP 500 list shines a light on the most forward-thinking and innovative of these key organizations.

The list is divided into three categories: the MSP Pioneer 250, recognizing companies with business models weighted toward managed services and largely focused on the SMB market; the MSP Elite 150, recognizing large, data center-focused MSPs with a strong mix of on-premises and off-premises services; and the Managed Security 100, recognizing MSPs focused primarily on off-premise, cloud-based security services.

eNet Systems, Inc. has been distinguished as a Pioneer 250 company because of our success in helping our clients effortlessly maximize their technology's impact to improve their business through the Managed IT Services that we provide. By moving our clients from a reactive, break/fix model to a more proactive technology strategy, they can now focus their energies entirely on their core business as we continually monitor their IT network.

"Managed service providers have become integral to the success of businesses everywhere, both large and small," said Bob Skelley, CEO of The Channel Company. "Capable MSPs enable companies to take their cloud computing to the next level, streamline spending, effectively allocate limited resources and navigate the vast field of available technologies. The companies on CRN's 2018 MSP 500 list stand out for their innovative services, excellence in adapting to customers' changing needs and demonstrated ability to help businesses get the most out of their IT investments."

"We are thrilled to receive this award from The Channel Company," says eNet President, Ash Pirwani. "We continually strive to offer our clients the absolute latest and safest technologies to protect and enhance their systems – and it's pleasing to see our efforts are being recognized."

The MSP500 list will be featured in the February 2018 issue of CRN and online at CRN.com/msp500.

About eNet Systems, Inc.
eNet Systems, Inc. has been serving the technology needs of our Houston clients for nearly two decades. We continue to grow as our clients evolve into forever partners. Our pioneering company handles infrastructure services, network design, managed services, computer support, and employee training, but that's not all. We function best as a total technology solutions provider. On a strategic planning level, we meet with businesses, practices and organizations to discuss specific business needs and determine what technology is needed to achieve those goals. On a project management level, we plan, design, implement and test these technology enhancements. On a day-to-day operations level, we monitor and maintain IT systems to ensure optimal performance and uptime.
